USE-CASE FLOW DOCUMENT

Clinical Trial Subject Recruitment Engine

Use Case: Apply for Clinical Trial

Use Case ID: UC-04

Use Case Name: Apply for Clinical Trial

Primary Actor: Trial Candidate

Supporting Actor: Clinical Researcher

System: Clinical Trial Subject Recruitment Engine

1. Use Case Description

This use case describes how a **Trial Candidate** applies for a suitable clinical trial through the Clinical Trial Subject Recruitment Engine. The system checks the candidate's eligibility, collects the required application information, and records the application for review by the Clinical Researcher.

2. Preconditions

1. The Trial Candidate has access to the Clinical Trial Subject Recruitment Engine.
2. The Trial Candidate has a profile containing the required eligibility information.
3. At least one clinical trial is available in the system.

3. Main Success Scenario

1. The **Trial Candidate** logs into the Clinical Trial Subject Recruitment Engine.
2. The system displays clinical trials that match the candidate's profile.
3. The Trial Candidate selects a suitable clinical trial.
4. The system displays the selected trial's details and eligibility criteria.

5. The Trial Candidate selects the **Apply for Clinical Trial** option.
6. The system checks the candidate's eligibility against the trial requirements.
7. The Trial Candidate provides the required application information.
8. The system validates the submitted information.
9. The system creates and records the candidate's application.
10. The system displays an application confirmation to the Trial Candidate.
11. The application becomes available for review by the **Clinical Researcher**.
12. The use case ends successfully.

4. Alternate Flow

4A. Candidate is Not Eligible

1. During the eligibility check, the system determines that the Trial Candidate does not satisfy one or more mandatory eligibility criteria.
2. The system informs the Trial Candidate that they are not eligible for the selected clinical trial.
3. The system does not create or submit the application.
4. The Trial Candidate can return to the available clinical trials.
5. The use case ends.

4B. Invalid or Incomplete Application Information

1. The system detects missing or invalid application information.
2. The system displays an appropriate error message.
3. The Trial Candidate corrects or completes the required information.
4. The system validates the information again.
5. If the information is valid, the system records the application.
6. The use case continues from Step 9 of the Main Success Scenario.

5. Postconditions

Success

- The candidate's application is recorded in the system.
- The application is available to the Clinical Researcher for review.
- The candidate receives confirmation that the application has been submitted.

Failure

- If the candidate is not eligible, no application is submitted.
- The candidate can return to the available clinical trials.
